

SUPPLEMENTARY TABLE**Supplementary Table 1. Circulating miR-126 and biological variables: partial correlation coefficient controlled for age**

Plasma miR-126	Partial R coefficient	P
Fasting glucose	-0.15	0.02
HbA1c	-0.15	0.01
Platelets	0.17	0.005
ApoAI	0.15	0.03

Only significant results are shown considering a correlation coefficient cut-off of 0.15 and a p value <0.05.
