

SUPPLEMENTARY INFORMATION

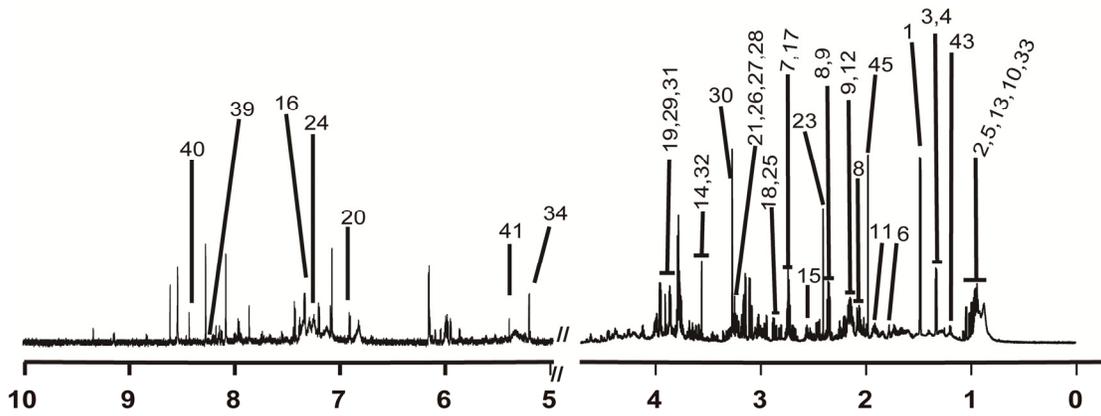

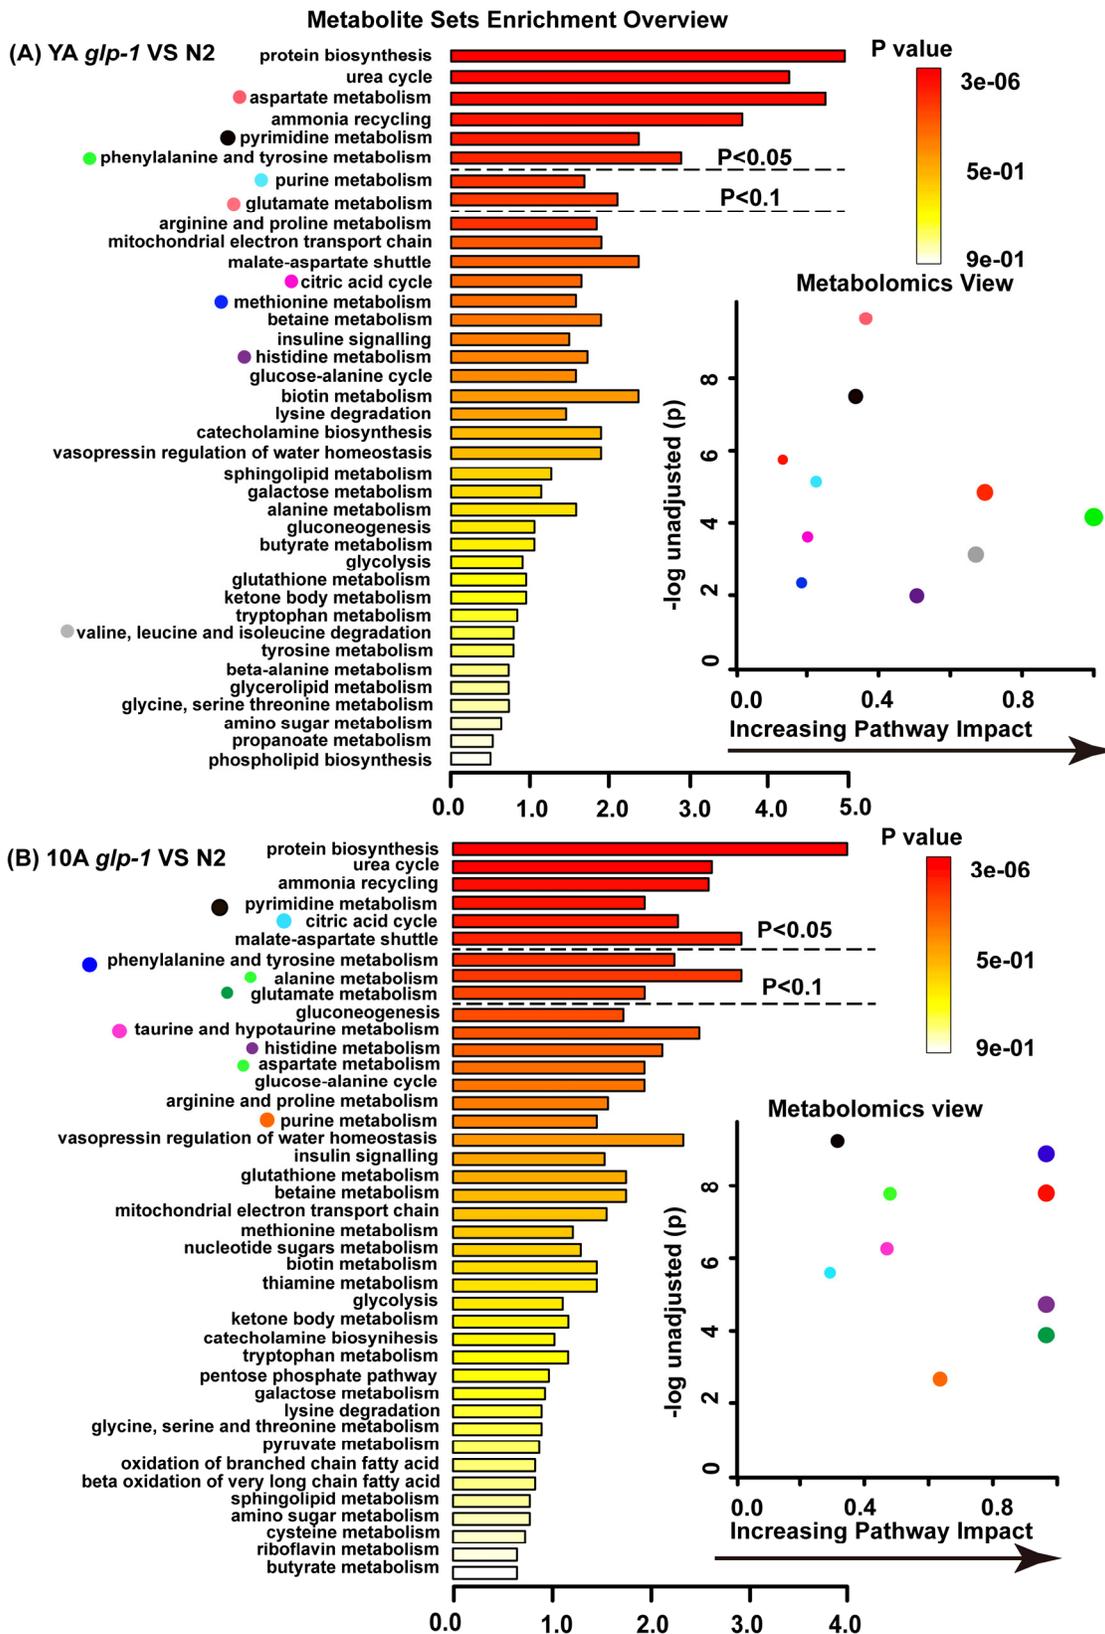

Figure S1. Typical 800MHz <sup>1</sup>H NMR spectra of *C. elegans*. Metabolites keys were showed in the Table S1 (supplemental information).

Table S1. <sup>1</sup>H and <sup>13</sup>C NMR data for metabolites keys: GPC, glycerophosphocholine; GSSG, glutathione disulfide; #, not determined.

keys	metabolites	moieties	δ1H (multiplicity)	δ 13C
1	alanine	αH	3.77(q)	53.4
		βH	1.48(d)	19.1
2	isoleucine	αCH	3.65(d)	62.4
		βCH	1.97(m)	38.7
		γCH <sub>2</sub>	1.47(m)	27.4
		γ'CH <sub>3</sub>	1.007(d)	17.6
		δCH <sub>3</sub>	0.94(t)	13.9
3	threonine	αCH	3.58(d)	63.3

**Figure S2. Pathway analysis for *glp-1* against wild-type.** Summary plot for metabolite enrichment analysis(MSEA) (left panel) and metabolome view as discussed in Figure 2A, which showed the different metabolites when *glp-1* compared with N2 in young adult (A) and days 10 of adulthood (B). Detailed description showed in the Figure 2A.

**Table S2. Summary metabolite variations with age in WT, *glp-1(e2141)*, and *daf-16(mu86);glp-1(e2141)* double mutants.**

Asteriks (\*) denotes metabolites are verified by reference standards. Superscript letter LC indicated metabolites were detected with UPLC-MS platforms. *P* values were calculated by Mann-Whitney U test, and the *p*-value of 0.05 or less was considered significant. All statistical were calculated by using SPSS package.

Asteriks (\*) denotes metabolites are verified by reference standards. Superscript letter LC indicated metabolites were detected with UPLC-MS platforms. Metabolite abundance level were reflected using colors, and with yellow being lower and red higher when mutants VS. N2. *P* values were calculated by Mann-Whitney U test, and the *p*-value of 0.05 or less was considered significant. All statistical were calculated by using SPSS package.

**Table S4. List of altered metabolites of each mutant strains against the wild type in days 10 of adult worms.** Detailed description showed in the Table S3.

metabolites (10-day-adult)	<i>P</i> value <i>glp-1</i> VS N2	<i>P</i> value <i>daf-16;glp-1</i> VS N2
