

SUPPLEMENTARY FIGURE

**Supplementary Figure 1.** (A, B) Wound-healing assay showed that FALEC knockdown promotes TSCC cell migration. Representative images (left) and average migration (right) are shown (C) Wound-healing assay showed that FALEC overexpression suppressed TSCC cell migration. Representative images (up) and average migration (down) are shown. Data are shown as means ± SD. \*p < 0.05, \*\*p < 0.01.
