

SUPPLEMENTARY FIGURES

Supplementary Figure 1. G₂/M phase arrest induced by EM-E-11-4 and paclitaxel (24 h) in A549/Tax cells. (A) Cell cycle effects of EM-E-11-4 (2.5, 5, and 10 μM) combined with or without 100 nM paclitaxel in A549/Tax cells. **(B)** The cell cycle distribution of A549/Tax cells.

Supplementary Figure 2. G₂/M phase arrest induced by EM-E-11-4 and paclitaxel (24 h) in HeLa/βIII cells. (A) Cell cycle effects of EM-E-11-4 (2.5, 5, and 10 μM) combined with or without 20 nM paclitaxel in HeLa/βIII cells. **(B)** The cell cycle distribution of HeLa/βIII cells.
