

SUPPLEMENTARY FIGURE

Supplementary Figure 1. Comparisons of CSF Ng levels by sex status within A β group. In the A β + group, mean CSF Ng levels were higher in female individuals (Mean [SD]: 598.6 [318.8] pg/mL; n=108) compared with those in male individuals (Mean [SD]: 502.9 [380.6] pg/mL; n=165) (P=0.003). **P<0.01. Abbreviations: A β , amyloid- β ; CSF, cerebrospinal fluid; Ng, neurogranin.
