

SUPPLEMENTARY FIGURE

Supplementary Figure 1. Overexpression of miR-199a-3p took cellular protective effects against Dox. (A) Cell viability was analyzed with the MTT assay. (B, C) Representative flow cytometric dot plots of apoptotic cells after Annexin V/propidium iodide staining. * $P < 0.05$ versus Control; $P < 0.05$ versus Dox +miR-199a-3p mimic in repeated-measures ANOVA, $n = 6$ per group.
